DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 15-22 and 26-31, drawn to methods of inhibiting or preventing Alzheimer's Disease comprising administering a DNA sequence encoding an antibody specific for the C or N-terminus of an amyloid beta peptide, the DNA sequence, vectors, comprising the sequence, cells comprising the vector and pharmaceutical compositions comprising the DNA sequence, classified in at least class 514, subclass 44.
- II. Claims 14 and 23-25, drawn to antibodies, classified in class 530, subclass 387.1.

2. The inventions are distinct, each from the other because of the following reasons:

Invention I and invention II are mutually exclusive and independent. The method of invention I does not require an antibody, as the antibody is produced via expression of the DNA sequence. The antibody of invention II does not require the method of Invention I as the antibody can be made by injection of protein into a mammal and the antibody isolated from the animals blood.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1645

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (703) 308-4242.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia A. Duffy, Ph.D. whose telephone number is (703) 305-7555. The examiner can normally be reached on Tuesday-Saturday from 10:00 AM to 6:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith, can be reached at (703) 308-3909.
